

Product Overview

This report helps you to understand the principal flood risks at your site. It is designed for commercial properties, agricultural land or more valuable residential properties.

What's included:

Front page 'at-a-glance' summary

Consultant's Professional Opinion

Insurability Assessment

River and Coastal Flood data from EA, Surface Water data from JBA

ESI Groundwater Flood Risk data

Key Flood Data

- Official Environment Agency data**
 The report includes key flood data from the government sanctioned source.
- ESI Groundwater Flooding Data**
 A commercial site does not need to be near a river or the sea to be flooded. This valuable data identifies where groundwater flooding could potentially occur.
- BGS geological indicators**
 Past flooding gives a strong clue to where flooding may occur in the future. BGS identifies geological deposits associated with flooding to show where potential future flooding could occur.
- JBA Risk Management**
 JBA is the largest specialist flood consultancy in the UK and the leading supplier of flood information to the insurance industry and property market. This report contains JBA's data covering risk from Surface Water flooding.

Sitecheck™ Flood Report

Commercial flood risk report with a professional opinion

With approximately 185,000¹ commercial properties at risk in England and Wales, and 9,000² of those affected by the summer 2007 floods, an accurate and comprehensive flood risk assessment for commercial properties is essential to ensure that you and your clients avoid the potential cost and inconvenience of flooding.

¹ Environment Agency, ² BBC

Risk Assessment:

- Fully interpreted flood risk report providing commercial advice
- Market-leading risk model designed by experienced consultants
- Analyses the latest data from JBA Risk Management, ESI, Ordnance Survey, Environment Agency, and British Geological Survey – used by insurers and regulatory bodies

Flood Data includes:

- Risk and likely depth of surface water flooding, a major cause of flooding in urban areas – used by the Environment Agency and Local Authorities for emergency planning and development purposes.
- Includes the latest Risk of Flooding from Rivers and Sea (RoFRS) data from the Environment Agency – recommended by the Association of British Insurers as a reliable indication of insurability for small businesses.
- ESI's Groundwater Flood risk map and data offers an indication of actual flood risk, not just susceptibility.

Also includes:

- Clear maps to illustrate if the property is at risk of flooding
- Search radii up to 500m with the latest high resolution aerial photography
- Description and indicative pricing for flood resistance measures
- Comprehensive terms and conditions
- Liability cover of £10 million per report
- One working day turnaround, expedited at no extra cost
